PROFILE

I am a computer science graduate with a strong interest in web development. I look forward to applying my skills and learning more through practical training in this field. I am also interested in internships during this period

Internship Experience

- ITON Company – Amman, Jordan |Network Engineering Intern| June–August , 2025
  - Learned about computer hardware components and their functions.
  - Studied basic networking concepts and communication protocols.
  - Gained practical experience with CCNA fundamentals through hands-on labs.
  - Configured and tested network connections to understand how devices communicate.
  - Introduced to MCSA concepts and system administration basics.

EDUCATION

- **Zarqa University | 2021 - 2025**
  - Bachelor's in Computer Science
- **Courses**

  - Data Structures & Algorithms: Explored sorting, searching, and optimization techniques.
  - Introduction to Web Development: Built dynamic web pages using HTML, CSS, and JavaScript.
  - Database Management Systems: Designed and implemented databases using MySQL.

PROJECTS

- Graduation Project - Bordereyes | June, 2025

  Designed and developed a smart surveillance system to detect, track, and classify objects crossing national borders using AI and simulation technologies.
  - Technologies Used: OMNeT++ for simulating sensor networks, and integrated deep learning models for object recognition and behavior analysis.

- Math Quiz Game | October, 2024

  An interactive game that generates math questions based on selected difficulty levels, covering addition, subtraction, multiplication, and division. It records user responses, displays scores, and provides correct answers for incorrect responses.
  - Technologies Used: C++

- Clinics Management System | June, 2024

  A web application enabling patients to book appointments with doctors, supporting full CRUD functionality, database design, and user-friendly forms.
  - Technologies Used: HTML, CSS, JavaScript (Frontend); PHP (Backend); MySQL (Database)

SOFT SKILLS

- Problem-Solver and Analytical Thinker
- Team player
- Communication Skills
- Attention to Detail

TECHNICAL SKILLS

- Programming Languages: Python, Java, C++
- Web Development: HTML, CSS, JavaScript
- Knowledge of OOP
- Database Management: MySQL, Oracle
